

## Wycliffe College Results 2011

Wycliffe does not select its pupils using artificially high academic criteria, preferring instead to offer places to students who are able to make the most of the whole range of educational benefits it has to offer.

If an analysis of those students who would have secured places at selective schools is made, Wycliffe's results would have been as below. If comparisons are being made with selective schools, this is the fairest table to use.

For value-added scores, Wycliffe has been consistently on the the top 10% of the UK for several years and in the past two years, the top 2% for AS / A levels.

<b>A level results 2011</b>
